

Pause. Check. Carry on.

Scam detection, made clear.

Owner-selected name. Proposed identity and slogan for review.

THE BRAND

Strategy.

Identity.

Language.

Motion.

One brand. A complete system.

Use these rules across the app, support, marketing and every new platform.

The brand in one sentence

RMAK helps people check for signs of a scam and understand what to do next.

The experience it should create

A calm second look. A clear explanation. A practical next step. The user stays in control.

What is fixed in this edition

RMAK is the name you selected. The visual system extends the existing Precision design direction.

PAGES	CONTENTS
03-09	Name, purpose, audience and messaging
10-15	Logo system and app identity
16-22	Color, type, layout and imagery
23-26	Voice, product copy and architecture
27-30	Motion and product applications
31-34	Marketing and business applications
35-38	Governance, assets and references

RMAK

Write it in capitals. Give unfamiliar audiences a plain-language description.

RMAK

PREFERRED SPOKEN FORM

R. M. A. K.

Use the four letters in speech until the owner selects another pronunciation. Do not invent an acronym expansion.

PRIMARY SLOGAN

Pause. Check. Carry on.

Scam detection, made clear.

Descriptor for first-time audiences.

Exact spelling: RMAK. Avoid Rmak, R-MAK and RMAK AI. The name is owner-selected; domain, social handle and trademark availability have not been verified. Use no registration symbol.

Make the next step clearer.

Every brand decision should support understanding, independence and control.

01 ## Mission

Help people recognize possible scams and choose their next step with more confidence.

02 ## Vision

A digital world where taking a moment to check feels normal, at every age.

03 ## Brand promise

Explain what looks suspicious, say what is uncertain and make the next action understandable.

04 ## Standard of behavior

Never use fear to rush a person. Never shame them for asking. Never turn a detection result into a guarantee.

The brand earns trust through the product experience, not through reassurance alone.

Designed for independence.

Older adults are the primary audience. Age is not a proxy for technical ability.

01

The person checking

An unfamiliar message, payment request or warning interrupts an ordinary day.

DESIGN FOR

A readable explanation and one next step.

02

The trusted helper

A family member or friend helps someone review a suspicious situation.

DESIGN FOR

A shareable explanation with consent.

03

The person choosing

Someone evaluates the app for themselves or a person they care about.

DESIGN FOR

Clear capability, price and privacy information.

These are working audience hypotheses, not research findings. Validate language, reading size and flows with older adults who have different devices and levels of experience.

A second look you can understand.

Position RMAK around an understandable decision, supported by specific product behavior.

For people who want a second look at suspicious digital content, RMAK is a scam-checking app that explains warning signs in plain language, so they can choose what to do next.

01 ## Lead with the task

"Check this message" is more useful than a technical claim about the detection engine.

02 ## Show the reason

Connect the result to a specific sign: urgency, an unusual payment request or an unfamiliar sender.

Differentiation to demonstrate: readable explanations, honest uncertainty and an accessible workflow. Do not claim these are unique in the market without comparative research.

Calm. Direct. Capable.

A considered product for adults. Never a scolding authority or an overprotective guardian.

TRAIT	HOW IT SHOWS UP	WHAT TO AVOID
Calm	Measured pacing; steady warning panels.	Sirens, alarmist red and countdowns.
Direct	Short labels; concrete next steps.	Jargon and vague reassurance.
Respectful	Offer choices; ask before sharing.	Baby talk and assumptions about age.
Precise	Name the sign and the limitation.	"100% safe" or invented accuracy.
Dependable	Stable patterns and familiar controls.	Surprise interactions and hidden exits.

One message at each level.

The slogan expresses the brand. The descriptor explains the category. The interface names the action.

NAME	**RMAK** Always capitalized.
SLOGAN	**Pause. Check. Carry on.** Use on brand and campaign surfaces.
DESCRIPTOR	**Scam detection, made clear.** Pair with the name at first exposure.
SHORT PITCH	**Check for signs of a scam. Understand what to do next.** Use where space allows a useful explanation.
PRIMARY ACTION	**Try a check** For a working acquisition flow; no implied free trial.
IN-PRODUCT ACTION	**Check this** For a submitted item inside the app.

The moment before you respond.

Use this story in a brand introduction, press background or founder presentation.

A message asks you to act quickly.

A warning looks official.

A request does not feel quite right.

RMAK gives that moment a clear place to go. It helps people examine signs of a scam, understand the concern and choose a next step without being rushed.

You are allowed to pause.

You do not need to feel embarrassed for checking.

Brand narrative, not a founder biography. Do not invent a founding event, customer story or detection performance.

The RMAK signature.

A split R symbol and an open, readable wordmark. Built to remain clear at small sizes.

The symbol

The separated stem creates a brief visual pause. The forward leg suggests a next step.

The wordmark

Uppercase Inter, optically spaced and delivered as outlines. Use the supplied artwork.

Use the right signature.

Keep one identity across a broad range of spaces. Do not combine different variants on one surface.

PRIMARY / COLOR

REVERSED / WHITE

WORDMARK / COMPACT SPACES

SYMBOL / APP AND AVATAR

Also supplied: stacked, monochrome ink and all-blue signatures. Use the full wordmark where RMAK is unfamiliar.

Protect the space around it.

The symbol is drawn on a 64-unit grid. Its two shapes remain separate.

64-unit source grid / 4-unit internal gap

CLEAR SPACE: X = 1/4 SYMBOL GRID HEIGHT

x

Keep at least x on every side of a lockup, measured from its artwork. Keep the gap and relative scale of the symbol and wordmark unchanged.

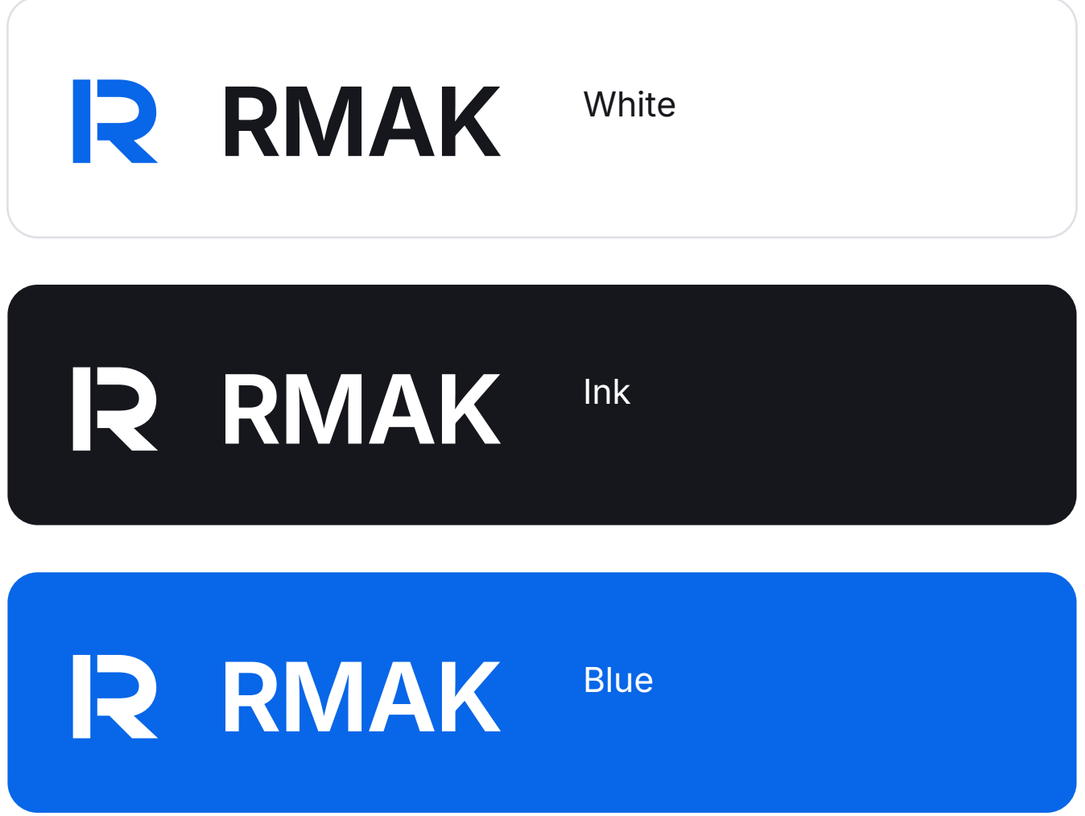

Use the exported master rather than rebuilding the geometry. The guide diagram is illustrative; vector coordinates in sources/logo-construction.json are authoritative.

Clarity at every size.

Minimum sizes are starting points. Inspect the actual output before release.

ASSET	DIGITAL	PRINT
Horizontal logo	144px wide	30mm wide
Wordmark only	96px wide	20mm wide
Symbol only	24px square	6mm square
Tray / favicon	16px variant	Not for print

Use symbol-only marks where the name is already visible or familiar. When space is tight, remove the slogan before shrinking the logo.

On photography, add a clean solid panel if the background competes.

Keep the signature intact.

Consistency matters more than inventing a new treatment for every campaign.

01 / AVOID

Do not stretch

Change the container, not the logo ratio.

02 / AVOID

Do not recolor

Use only supplied color variants.

03 / AVOID

Do not add effects

No glow, bevel, shadow or outline.

04 / AVOID

Do not rearrange

Keep the supplied symbol-to-name relationship.

05 / AVOID

Do not add a shield

Do not turn the mark into a security badge.

06 / AVOID

Do not attach claims

No "certified", "guaranteed" or unearned seal.

Recognizable before it opens.

The app icon carries the symbol only. Status belongs inside the product or in a separate system indicator.

LIGHT

DARK

MONO

A square master, not a baked-in mask

Use the unmasked 1024px master for Apple source artwork. Rounded preview assets are for marketing and legacy exports.

Apple

Foreground and background layers are included. Assemble and preview current appearances in Icon Composer/Xcode.

Android

108dp layers use a centered safe-area symbol. Adaptive XML, themed monochrome and legacy PNGs are included.

Windows and web

ICO, favicon and monochrome tray files are included. Validate small sizes in the real app.

A restrained palette. A clear signal.

Blue identifies RMAK and the main action. Neutral space carries the content.

RMAK Blue

#0866E8

RGB 8, 102, 232

Primary action and identity

Ink

#15171C

RGB 21, 23, 28

Primary text and dark brand surfaces

Paper

#FFFFFF

RGB 255, 255, 255

Main content surface

Canvas

#F5F5F7

RGB 245, 245, 247

App background

Secondary text

#626670

RGB 98, 102, 112

Supporting copy

Digital values use sRGB. For print, convert with the printer's ICC profile and approve a proof. No universal CMYK or Pantone match is claimed.

Color explains a state.

Every state also needs a text label and a meaningful icon. Blue remains the brand color.

STATE	LIGHT TEXT	LIGHT BG	DARK TEXT	DARK BG	LABEL
Likely scam	#A32D25	#FFF0EE	#FFB3A8	#3E2425	Likely scam
Uncertain	#805600	#FFF5DC	#F2D08B	#3B3321	Needs a closer look
Information	#17549D	#EDF4FF	#AFCEFF	#1C2D47	Information
No obvious signs	#236A42	#EAF6ED	#9ED9B4	#1D3428	No obvious signs

Green never means guaranteed safe. Unavailable checks use a neutral explanation with a retry action.

Dark mode is a separate palette.

Canvas #101115 / Surface #1A1C22 / Text #ECEEF4 / Action #7AB1FF

Readable is part of the brand.

These are design targets and measured color pairs. They do not certify a complete app.

PAIR	RATIO	USE
Ink / white	17.93:1	Text
Secondary / white	5.75:1	Text
White / brand blue	5.15:1	Button
Risk / risk surface	6.40:1	Text
Caution / caution surface	5.95:1	Text
Control border / white	3.91:1	UI edge

- Default product body: 20px. Large mode: 24px. Respect system text scaling.
- Primary and secondary controls: at least 56px tall. Compact product targets: 48px.
- Keep keyboard focus visible: 3px ring with 4px offset. Never use color alone.
- Test zoom, reflow, screen readers, real device text scaling and reduced motion.
- Use short reading paths and keep important actions visible without hover.

WCAG 2.2 AA reference: normal text 4.5:1; large text 3:1. Its target minimum is 24 CSS px with exceptions. RMAK deliberately sets larger product targets.

Inter. Quietly confident.

One primary family gives the app, brand and communications a common voice.

Aa Inter

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

0123456789 @ & ? !

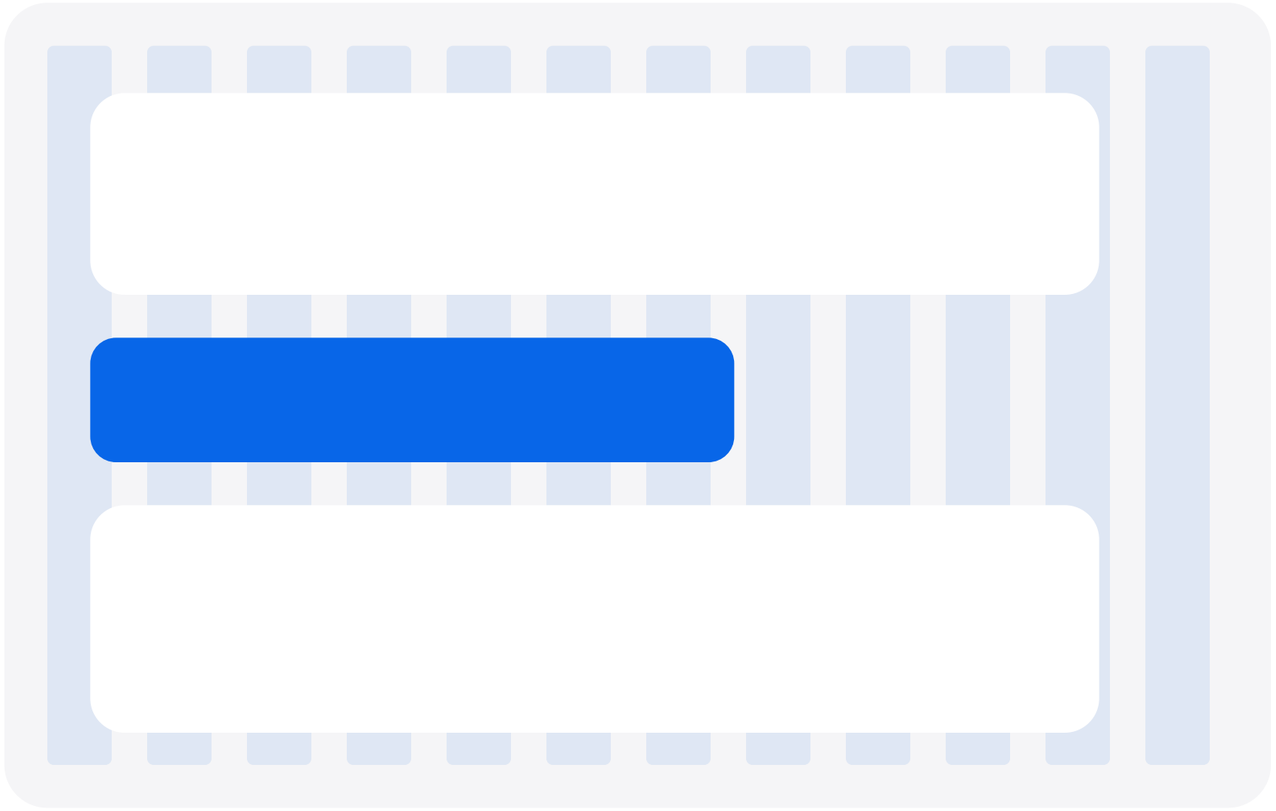

Use 400 for body, 500 for labels and 600 for emphasis. The outlined wordmark uses 650. Never set ordinary paragraphs in all caps.

ROLE	SIZE	LINE HEIGHT
Brand display	48-88px	1.08-1.15
Product display	42px	1.15
Product title	34px	1.2
Body	20px	1.5
Supporting	17px	1.45
Large body	24px	1.5

Atkinson Hyperlegible Next is an optional reading preference. Native apps may use the system UI font while preserving scale and hierarchy.

Let the content breathe.

Use alignment, generous spacing and decisive hierarchy. Decoration never replaces information.

12 COLUMNS DESKTOP / 4 COLUMNS MOBILE

- Spacing scale: 4, 8, 12, 16, 20, 24, 32, 40, 48 and 64.
- Radius: 8 compact; 12 controls; 16 cards; 20 panels; 24 dialogs.
- Readability: one main action per step. Keep text measures near 45-70 characters.
- Depth: thin borders first. Use a small shadow only when layering needs explanation.
- Mobile: stack in reading order. No dense desktop dashboard squeezed into a phone.

Use structure as the decoration.

The identity combines a precise symbol, generous fields of color and purposeful line icons.

A large mark can anchor a brand surface.

01

Use the split

A narrow open seam or a quiet gap can echo the mark. Use it sparingly in dividers or campaign framing.

02

Make icons functional

Use the supplied 24-unit UI icon set at 1.7px stroke. Label unfamiliar icons. Keep state icons separate from the brand.

Avoid abstract 3D blobs, padlock wallpaper, stock shields and ornamental charts.

Show people with agency.

Photography should make the brand feel familiar and adult. The interface remains the main proof.

01 ## Subject

Older adults using technology in ordinary life: planning a visit, reading a message or reviewing a purchase.

02 ## Composition

Natural light, real environments and open space for copy. Keep hands and devices plausible. Favor eye-level framing.

03 ## Casting and tone

Show a range of ages, backgrounds and abilities. Let people be independent, curious and engaged.

04 ## Reject these shortcuts

A frightened person clutching a phone. A helpless grandparent. A hoodie-wearing hacker. An invented customer endorsement.

Use commissioned or properly licensed images. Label synthetic illustrations when context could imply a real customer.

Say what matters. Then stop.

Use everyday language, a steady tone and specific actions. Address the person as an adult.

SITUATION	USE	AVOID
Checking	"Let's take a closer look."	"Our advanced AI is analyzing threat vectors."
Possible scam	"This message has signs of a scam."	"Danger! You are being hacked!"
Uncertainty	"We could not confirm the sender."	"Probably fine. Don't worry."
Error	"The check did not finish. Try again."	"Oopsie! Something went wrong."
User mistake	"You can review the next steps."	"You should never have clicked that."

Sentence case for UI. Use contractions naturally. Explain unfamiliar terms. Reserve exclamation marks for rare, non-critical celebrations.

Make uncertainty explicit.

The state, reason and next action should form one readable explanation.

LIKELY SCAM

This message has signs of a scam.

It asks you to act urgently and use an unusual payment method.

Review the warning signs >

NEEDS A CLOSER LOOK

We could not confirm this request.

Contact the organization using details you already trust.

See what to check >

NO OBVIOUS SIGNS

No obvious scam signs found in this check.

This does not confirm that the sender or request is genuine.

Review the details >

CHECK UNAVAILABLE

We could not complete this check.

Try again. Do not interpret an incomplete check as a safe result.

Try again >

Give control before asking for trust.

Permission copy must describe the actual product behavior, purpose and user controls.

First-run welcome

"Welcome to RMAK. Take a second look at something that feels suspicious."

Permission denied

"Screen access is off. You can turn it on in settings when you are ready."

Screen access explanation

"Screen access lets RMAK check visible content for signs of a scam. You can pause checks in the app."

Use only for a platform where this capability exists. Explain actual capture, processing, retention and transmission before permission. Those details must come from the implementation.

Asking for help

"You can ask someone you trust to review this with you. Choose what to share before sending."

A share control must show the exact content and recipient before sending. Never imply that family monitoring or human support is included unless it actually is.

One name across platforms.

Use simple platform labels and feature names. Product availability must reflect the current release.

NAME	ROLE	STATUS IN THIS BRIEF
RMAK	Master brand and product name	Owner-selected name
RMAK for Windows	Windows desktop app	Available, per owner
RMAK for Mac	macOS desktop app	Available, per owner
RMAK on the web	Web application	Available, per owner
RMAK for iPhone	Apple mobile app	In development, per owner
RMAK for Android	Android mobile app	In development, per owner

Use descriptive features: Check a message, Screen checks, Recent checks, Settings. Do not invent tier names, a family plan or "RMAK Pro" until the product and offer are defined.

Movement with a job to do.

Motion connects an action to its result. It should never compete with a warning or make the product feel rushed.

USE	DURATION	BEHAVIOR
Press	120ms	Move 1px; settle
Control state	180ms	Color or opacity
Warning entrance	240ms	Opacity + up to 8px
Panel entrance	280ms	Up to 8px travel
Brand / completion	600ms	Finite, one-time reveal
Graph reveal	900ms	Reveal actual values

- Ease: cubic-bezier(.2, .8, .2, 1). No springy overshoot for important messages.
- Reduced motion: show the final state instantly. Keep progress information in text.
- Critical warnings do not auto-dismiss. Never shake, flash or pulse them indefinitely.
- Do not delay an actionable result to finish an animation. Sound stays optional.

A living system. A steady experience.

Included motion preview: replayable brand reveal and a chart with explicitly labeled example data.

1. REGISTER

Acknowledge the press within 120ms.

2. EXPLAIN

Introduce the panel over 280ms.

3. RESOLVE

Show the final state as soon as it is ready.

For charts

Animate once when a real value changes. Keep axes, labels and final values stable. Provide the same data in text or a table.

For activity

If the app is working, a restrained progress treatment may repeat. Pair it with a text label. Stop it when work stops.

Never manufacture scanning progress, threat counts, protected-device totals or detection accuracy. Decorative motion must be pausable if it keeps running.

A clear place to check.

Illustrative product composition using the RMAK identity and the existing Precision tokens.

RMAK

EXAMPLE

Something feel off?

Check a message before you respond.

Paste a message

Your account will close today. Act now...

Check this

Read first

Large task heading, one clear input and one primary action. The user does not need to decode a dashboard.

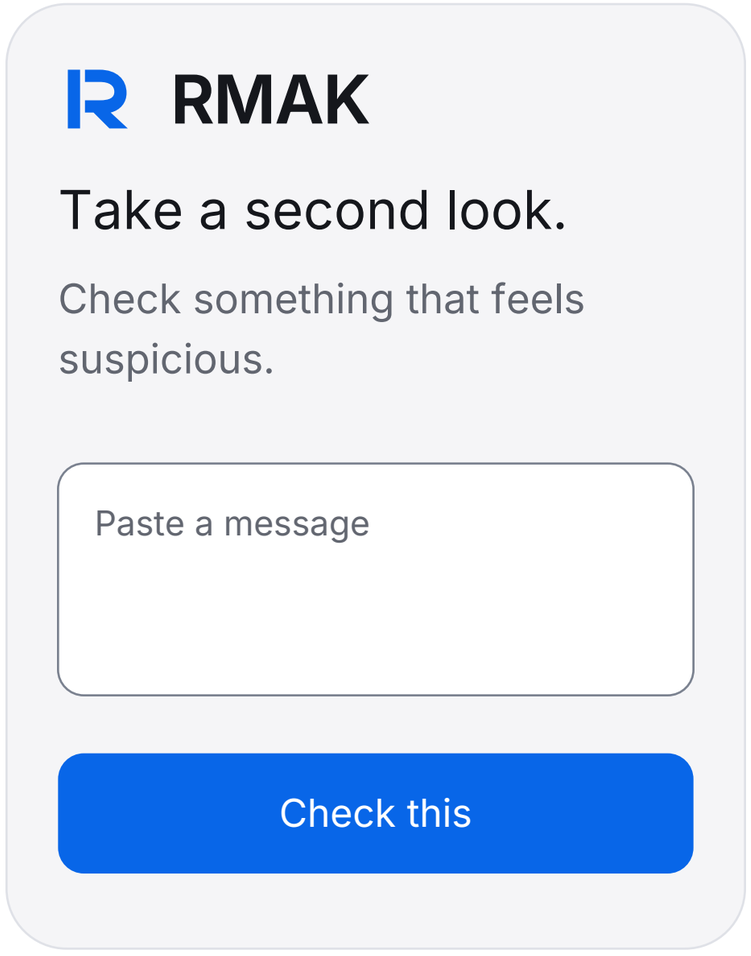

Keep context visible

Show what is being checked, what was found and what the next action will do.

Design example. It does not analyze the sample text.

The same clarity, closer at hand.

Respect native text scaling and safe areas. Mobile is a dedicated layout, not a reduced desktop window.

01 **Touch and reading**

56px primary controls, generous spacing and readable labels. Prefer visible actions over swipe-only gestures.

02 **Warnings that stay**

Use a focused result screen. Keep the action visible; preserve the explanation for later review when supported.

Platform prototypes do not imply that iOS and Android versions are available. Label those releases as in development until shipped.

One clear offer.

This is the message framework for the future sales website. It is not a published offer or checkout.

PRIMARY MESSAGE

Something feel off?

Take a second look with RMAK before you respond.

Check for signs of a scam. Understand what to do next.

Try a check

- One primary conversion action across the page.
- Show an honest product example and its explanation.
- State supported devices, actual pricing and what is included.
- Use evidence only when verified. No invented testimonials, ratings or counters.
- Do not call it free until a real free route is confirmed.

Before the sales site: approve the brand, choose the offer and confirm the actual acquisition destination. The site remains outside this delivery.

Recognizable in every format.

Editable vector templates and ready-to-use PNG exports are included in the asset pack.

RMAK

Use the same voice everywhere.

Ready-to-adapt copy. Verify feature and availability statements against the shipping product.

Short social bio

RMAK helps you check for signs of a scam and understand what to do next. Pause. Check. Carry on.

App listing opener

RMAK helps you check suspicious digital content for signs of a scam, with readable explanations and practical next steps.

Launch introduction

Meet RMAK. A place to take a second look at something suspicious, understand the warning signs and choose your next step.

Support opening

Thanks for telling us what happened. Let's look at the message and the next step together. Please leave out passwords and payment details.

Email subject

Something feel off? Take a second look.

Notification title

Review a possible scam

A consistent professional presence.

A useful identity should work in a support reply as well as an app icon.

RMAK

Pause. Check. Carry on.

BUSINESS CARD / FRONT CONCEPT

Use a standard local card size with printer-approved bleed. On the reverse, add only real contact details. No invented address or domain.

EMAIL SIGNATURE STRUCTURE

Name / Role

RMAK

Scam detection, made clear.

Document and presentation rules

Logo at the opening, concise title, generous margins and a clear owner/date. Repeat the small wordmark in the footer only when it helps orientation.

The starter signature template contains explicit editable placeholders.

Keep a single source of truth.

Assign a brand owner and review changes against the guide before release.

AREA	RULE	OWNER TO ASSIGN
Identity	Use master assets; never redraw the logo.	Brand / design
Product language	Explain outcomes and uncertainty accurately.	Product / support
Claims and offers	Verify proof, price and supported capabilities.	Business / product
Privacy explanations	Match the actual data flow and controls.	Engineering / privacy owner
Accessibility	Test real flows with assistive technology.	Design / engineering
New platforms	Adapt layout while keeping core identity.	Platform lead

Version assets deliberately: major identity change 2.0; new applications 1.1; export correction 1.0.1. Archive old versions so the team does not mix them.

What is ready. What needs a decision.

The identity system is concrete and reviewable. Business claims require evidence from the actual product.

INCLUDED IN THIS DELIVERY

- RMAK name usage, proposed slogan and complete messaging system.
- Logo family, vector masters, raster exports, app icons and fonts.
- Color, type, layout, UI alignment, motion and accessibility guidance.
- Product examples, campaign templates, email starter and handoff files.

BEFORE A PUBLIC LAUNCH

- Approve the proposed symbol and slogan. Confirm the spoken name if desired.
- Confirm name rights, domain and handles. None are reserved by this work.
- Set the real price, plan contents, support route and conversion destination.
- Verify privacy statements, platform capability, native icon builds and accessible flows.

No sales website, paid subscription or public rebrand has been published as part of this guide.

Everything has a place.

Open START_HERE.html in the downloaded pack for a visual asset browser and motion previews.
